**Impression:**

This is a 55 y.o. male who was assessed 9/12/2020. This patient has SARS-CoV-2 infection.  
He is now Day 12 from symptom onset and has completely recovered.

The patient was instructed to return to hospital in event of:

1. Deteriorating symptoms, worsening shortness of breath
2. Severe chest pains
3. Unable to keep food or liquids down, dehydration
4. Neurological symptoms, unable to speak, walk, balance etc
5. Heart rate persisting over 100
6. Oxygen saturation < 95% if the patient is monitoring

**Plan:**

Follow up as needed  
If further health concerns, f/u with FMD  
No additional investigations at this point.  
The patient will follow Public Health recommendations as it relates to self-isolation protocol and duration.
