Interaction Time

1300-1320

Subjective

Telephone assessment.

Similar to online shopping or other online activities, Virtual Care has some inherent privacy and security risks that your health information may be intercepted or unintentionally disclosed. We want to make sure you understand this before we proceed. In order to improve privacy and confidentiality, you should also take steps to participate in this virtual care encounter in a private setting and should not use an employer's or someone else's computer/device as they may be able to access your information.

If you want more information, please review the patient information sheet we have sent you. You should also understand that virtual care is not a substitute for attending the Emergency Department if urgent care is needed. Are you ok to continue? Yes.

No change in presentation.

She tells me that she got her first loading dose of invega sustenna on Dec 8, second dose due on Dec 11.

She has since stopped the oral olanzapine which seems reasonable.

She denied any psychotic or mood symptoms.

Sleeping and eating well.

Denied any SI/HI.

Denied any substance use.

No side effects from the med changes so far.

The last medication reconciliation was completed on July 16 2019.

Flags: @ -Abnormal, C -Critical, L -Low, H -High
