Dear Dr. Jason H T Lo CCFP:

**Diagnosis:** Seborrheic keratoses-face, possibly inferior L breast, medially

**Treatment:** I reassured her as to the benign nature of these SK types of lesions. At her request, cryotherapy was applied and with a few more treatments, there should be excellent improvement. I stressed the importance of not picking.

I'm not 100% certain that the breast lesion is a SK but will keep an eye on it.

Thank you for allowing me to participate in your patient's care.

Kind personal regards.

Yours truly,
