14 DAY CONTINUOUS ECG MONITOR REPORT

(post-hoc analysis of data obtained with Icentia CardioSTAT single channel continuous recorder)

RESTING 12-LEAD ELECTROCARDIOGRAM

HR: 74 BPM

ECG: Normal.

CONTINUOUS ECG MONITOR DATA

1. Normal sinus rhythm, heart rates between 46-127 BPM and an average heart rate of 73 BPM.
2. There were 5 ventricular premature beats.
3. There were 378 atrial premature beats. There were 9 atrial couplets and 1 atrial triplet.
4. There was no supraventricular tachycardia. There was no ventricular tachycardia.
5. There were no pauses. There was no significant ST depression.
6. There were 2 symptoms of dizziness corresponding to no ECG abnormality.

INTERPRETATION

Normal sinus rhythm. Rare ventricular premature beats. Occasional atrial premature beats with 9 atrial couplets and 1 atrial triplet. 2 symptoms of dizziness corresponding to no ECG abnormality.

Total number of beats: 1292725; percentage of ventricular beats: 0.0%; percentage of supraventricular beats: 0.0%
