Dear Dr. Jason H T Lo CCFP:

Re: Ruby Politis May 16, 1961 Age: 59 yr HN: 5843 348 532 KT

Thank you for asking me to see Ms. Politis for an allergy assessment. I spoke with her on Dec 8, 2020 because of the current unfortunate circumstances we find ourselves in.

History: She was visited by a family with a dog in the summer. She became very itchy. She took a shower and the itchiness went away. She did not have any respiratory symptoms. They want a dog now so she wants to rule out an allergy to dogs.

She reacted badly to an insect sting in the past. It felt like an electric shock with a feeling of foreboding and she felt uncomfortable. She had allergy testing years ago after she was stung, but the results are unknown. She was given an EpiPen but she does not carry an EpiPen.

She has a history of very mild allergic rhinoconjunctivitis. She has dry eyes which occur during the fall. The symptoms have been present for years.

Her systemic enquiry is negative for food allergy, asthma and eczema. She is allergic to Nitrofurantoin and Cefzil. She had skin rashes that started at the onset of the course of treatment. She has depression. She is using and HRT Bupropion. The rest of her enquiry is noncontributory.

Past Medical History: Her past medical history is unremarkable.

Family History: Negative for atopy.

Social History: She is a teacher. They live in a house. She is a non-smoker. There are no pets in the home. Inside the home there are hard wood floors. There is central forced air gas heating. There is central air conditioning.

Impression and Plan: Ms. Politis possibly has mild allergic rhinitis and an allergy to dogs.

Follow up: I will test her in the near future hopefully and will keep you informed.

Re: Ruby Politis May 16, 1961 Age: 59 yr HN: 5843 348 532 KT

Thank you for allowing me to share in the care of Ms. Politis. Please do not hesitate to contact me if you have any questions or concerns.
