Dec 10, 2020

Dear R. Jason Lo Fax: (905)480-0898

RE: Fu, Bang Hua DOB: Dec 25, 1963

I was asked to see Mr. Fu again in follow-up. He was booked to see me today, unfortunately, because of COVID, our clinics have moved to virtually. He continues to produce a white-colored sputum, maybe 1 small teaspoon in amount in a day. There is no obvious hemoptysis. Overall, because of COVID he has been off work since the Casinos are closed.

**PAST MEDICAL HISTORY**

Childhood TB exposure through his mom; bronchiectasis diagnosed 2011. Previous hernia repair, 2010, Shouldice Clinic

**MEDICATIONS**

Advair 125/25 2 puffs BID

**ALLERGIES**

None known

**ASSESSMENT/PLAN**

Mr. Fu is stable from a bronchiectasis perspective. He should continue sputum surveillance. I will email the requisitions to him and he has bottles available. I will book him for 6 months, and if the COVID situation is better we can meet in person I will also plan for a CT at that time.

Sincerely,

Christie M. Lee, MD FRCPC
